Dear Student:

You are invited to take a research survey about students' knowledge and attitudes about alcohol, drinking behaviors, and outcomes related to drinking alcohol. The survey will help us see how well programs trying to reduce harms from alcohol use are working across different countries. Even if you do not drink alcohol, we still want your opinions. If you take the survey, your answers will be combined with those of thousands of other kids.

Some of the questions ask about sensitive and personal behaviors around the use of alcohol, including questions related to sexual experiences and criminal behavior. We will make sure that no one will learn how you answered.

- You will not be asked for any personal information that identifies you (such as your name) so **only you will know how you answered**.
- Once you submit the survey, **all information you entered on the tablet will go to a secure website** and will be erased from the tablet.
- The information you provide will **not be shared with anyone outside of the research team**.
- Findings from the survey will be **presented for large groups of kids, not individuals**.

The survey should take about 25-30 minutes for you to complete, depending on your answers. By checking the box below you are consenting to participate in the research. If you chose not to participate, there will be no negative consequences and you can use the time to read or do another activity. If you have any questions, please ask the survey staff.

Sincerely,
