READ and SHOW CARD:

For the rest of the survey when we talk about alcoholic drinks, please think of a “whole alcoholic drink” as a 350 mL glass, small bottle (longneck), or can of beer, a small 150 mL glass of wine, or a 30 mL shot of liquor such as vodka, whiskey, or cachaça. For example, a six-pack of beer consists of 6 drinks, a bottle of wine contains 5 drinks, and a typical 600 mL bottle of cachaça contains 20 drinks. If you had a larger drink, such as a 600ml bottle of beer or an oversized glass of wine, please consider that more than one drink.

- Q9** In the LAST 30 DAYS, did you drink **(interviewer read and rotate A-E)**? **(If necessary,** show pictures of each type of alcohol)
- Q10.** **(For each code 1 in Q9 A-E, ask)** In the LAST 30 DAYS, on how many DAYS did you drink **(read and rotate A-E, as appropriate, in same order as read in Q9)?** **(If necessary,** show pictures of each type of alcohol)
- Q11.** **(IF YES in Q9 A-E, ask)** Please think about a **typical** day when you drank **(read and rotate A-E, as appropriate, in same order as read in Q9)** in the last 30 days. How **many drinks** did you **usually** have on a day when you drank it? *If you are unsure, or the number varied, please tell me the most common number you drank.*
