For the rest of the survey when we talk about alcoholic drinks, please think of a “drink” as a 350 mL glass, small bottle (longneck), or can of beer, a small 150 mL glass of wine, a 30 mL shot of liquor such as vodka, whiskey, or cachaça.

For example, a six pack of beer consists of 6 drinks, a bottle of wine contains 5 drinks, and a typical 600 mL bottle of cachaça contains 20 drinks. If you had a larger drink, such as a 600ml bottle of beer or an oversized glass of wine, please consider that more than one drink.
