BACKGROUND

Anheuser-Busch InBev (AB InBev) is undertaking global efforts to reduce the harmful use of alcohol via its Global Smart Drinking Goals (GSDG) initiative by positively shifting alcohol norms, increasing individuals' health literacy about ways to avoid harmful drinking and ensuring that no- and low-alcohol beer products represent at least 20% of the company's global beer volume by year-end 2025. Additionally, site-specific interventions in nine intervention sites will be undertaken by the local steering committees. The outcomes targeted by the GSDG initiative include reducing binge drinking, underage drinking and driving after drinking. To assess whether the GSDG initiative is successful in achieving its goals, the AB InBev Foundation is funding an evaluation that includes annual adult and youth surveys across nine intervention sites and in nine comparison sites. Results will provide quantitative data for testing whether the initiative is associated with positive changes in alcohol knowledge, beliefs and behaviors reflective of reduced risk-taking and potential harms associated with alcohol.

This assessment involved conducting a face-to-face survey of 650 drinking-age adults (aged 18 and older) in Jiangshan, China and 650 drinking-age adults in Lanxi, China. The survey includes questions on the core outcomes relevant to all sites (e.g., drinking behavior, alcohol norms and outcome expectancies, impaired driving, binge drinking, etc.) and the tailored or site-specific outcomes related to locally implemented programs (e.g., motor vehicle crashes).

METHODOLOGY

AB InBev and HBSA selected the city of Jiangshan as its program area in China in 2016. Jiangshan is a county-level city in Quzhou prefecture, Zhejiang Province, with a population of about 600,000. Gallup collected secondary data from the 2015 annual government report on the 361 county-level cities in China that could potentially serve as a control city, including socio-demographic and economic factors such as electricity consumption, total value added across different sectors of the economy, number of broadband connections, etc. The city of Lanxi was selected as a control area. Lanxi has a similar population size and is equivalent to Jiangshan in all of the features examined. Both also have similar annual income levels, with about 35,000 RMB for Jiangshan and 32,177 RMB for Lanxi.

With a goal of obtaining a total of 1,300 completed surveys from adults of drinking age (aged 18 and older) in Jiangshan and its comparison site, Lanxi, Gallup conducted an in-person computer-assisted survey during the months of October, November, and December 2019. Households were randomly selected using a random-route methodology. The device randomly selected respondents who were drinking-age adults within households.

SAMPLING

The target population for this study was the civilian, non-institutionalized adult population living in Jiangshan and Lanxi. The population information for the sampling frame was derived from the National Bureau of Statistics, 2010 Population Census. The sample was stratified by city and the selection of Primary Sampling Units (PSUs) was conducted separately within each city.

Village committees were the local geographic units that served as PSUs. Village committees in both cities were selected using simple random sampling (SRS) by the following steps:

- **Step 1** The sampling frame was the full list of village committees in Jiangshan and Lanxi, which was obtained from the website of the National Bureau of Statistics.
- Step 2 Each village committee was entered into MS Excel[®] and a random number was assigned to it.
- Step 3 The village committees were then ranked according to the value of their random number.
- Step 4 The sampling selection interval was used to select the committees to survey using the random starting number.

| | JIANGSHAN | LANXI |
|------------------------------------------------------|-----------|---------|
| Total population | 616,388 | 660,489 |
| Adult population (18+) | 502,609 | 557,023 |
| Total interviews needed | 650 | 650 |
| Total number of PSUs available in the sampling frame | 311 | 356 |
| Number of interviews per PSU | 20 | 20 |
| Number of selected PSUs | 33 | 33 |
| Sampling interval | 10 | 11 |
| Random sampling start number | 4 | 4 |

 Table 1: Population parameters and number of selected PSUs per city

HOUSEHOLD SELECTION

Gallup uses random route procedures to select sampled households. In each PSU, the supervisor pre-selects two starting points/addresses for the interviewer, so that 10 interviews can be conducted per starting point, totaling 20 interviews per PSU. Once an interviewer reaches the starting point, he or she follows the right-hand rule to determine the households he or she will need to visit to attempt an interview.

Definition of a Household: All interviews take place at a person's home, which can be anything from a one room flat to a single house. To be eligible, a household has to have its **own cooking facilities**, which could be anything from a standing stove in the kitchen to a small fire in the courtyard.

Movement From the Starting Point: Once at the given starting point, the interviewer places his or her **back** to the (main) entrance of the structure and moves to the right (rule: *always go to the right*). Counting **three** households (excluding the starting point), the interviewer attempts a contact at the third household. This household is the first selected household. Unless an outright refusal occurs, the interviewer makes up to three attempts to secure an interview with a household member.

After visiting this first household, the interviewer continues to select the third household to the right, and so on. If the interviewer is not successful in completing an interview at a selected household, he or she replaces it with another household using the same procedure.

Interviewers are instructed to count individual households, as a house/apartment building can contain numerous individual households. Interviewers do not count unoccupied structures or group quarters. Group quarters are generally living arrangements such as hospitals, dormitories and military barracks.

RESPONDENT SELECTION

The interviewer records all household members aged 18 and older who live in the household. The CAPI (Computer Assisted Personal Interviewing) system then randomly selects the household member to be interviewed. If the selected respondent is temporarily unavailable, the interviewer revisits the household at another time. To increase the probability of contact and completion, interviewers make attempts at different times of the day and, where possible, on different days. If the selected respondent refuses to take part in an interview or is unavailable for the remainder of the field period, the interviewer replaces the household with another household (following the random-route procedure). The interviewer cannot interview any other person in the household other than the randomly selected individual. No more than one person per household can be interviewed.

FIELDWORK

All interviewers completed rigorous training that covered topics such as interview protocol, screening, probing, remaining neutral, expressing appreciation and handling refusals appropriately. Interviewers also completed ethics and confidentiality training to ensure they understood and followed Gallup protocols for protecting respondents' privacy.

Table 2: Fieldwork stats

| METRIC | |
|--------------------------------------|-----|
| Average total interviews/interviewer | 52 |
| Number of interviewers | 25 |
| Average total interviews per day | 39 |
| Number of days in the field | 33 |
| Min interviews/day | 5 |
| Max interviews/day | 145 |

Interviewers made at least three attempts to reach a person in each household, spread over different days and times of the day. When needed, interviewers made appointments for a return visit that fell within the survey data collection period. Fieldwork took place between October 30, 2019 and December 1, 2019.

Table 3: Completed interviews by date

| DATE | JIANGSHAN | LANXI | TOTAL |
|------------|-----------|-------|-------|
| 10/30/2019 | 0 | 23 | 23 |
| 10/31/2019 | 18 | 16 | 34 |

| 11/8/2019 | 0 | 51 | 51 |
|------------|-----|-----|-------|
| 11/9/2019 | 20 | 0 | 20 |
| 11/10/2019 | 85 | 60 | 145 |
| 11/11/2019 | 76 | 60 | 136 |
| 11/12/2019 | 0 | 60 | 60 |
| 11/13/2019 | 0 | 40 | 40 |
| 11/14/2019 | 0 | 40 | 40 |
| 11/15/2019 | 0 | 40 | 40 |
| 11/16/2019 | 19 | 0 | 19 |
| 11/17/2019 | 61 | 0 | 61 |
| 11/18/2019 | 40 | 0 | 40 |
| 11/19/2019 | 80 | 0 | 80 |
| 11/20/2019 | 40 | 0 | 40 |
| 11/21/2019 | 50 | 0 | 50 |
| 11/22/2019 | 49 | 0 | 49 |
| 11/23/2019 | 0 | 0 | 0 |
| 11/24/2019 | 0 | 0 | 0 |
| 11/25/2019 | 0 | 0 | 0 |
| 11/26/2019 | 0 | 0 | 0 |
| 11/27/2019 | 0 | 0 | 0 |
| 11/28/2019 | 15 | 0 | 15 |
| 11/29/2019 | 5 | 0 | 5 |
| 11/30/2019 | 0 | 0 | 0 |
| 12/1/2019 | 14 | 0 | 14 |
| Total | 650 | 650 | 1,300 |

The median length of a completed interview was 10 minutes 6 seconds in Jiangshan and 10 minutes 58 seconds in Lanxi. Length of interview excluded the screening portion of the interview (respondent selection, obtaining respondent consent). Interview start time was recorded when an eligible respondent was located and consented to participate. Thus, the total length of the household visit was slightly longer for each respondent.

Table 4: Interview lengths per city

| | JIANGSHAN | LANXI |
|--------|-----------|---------|
| Mean | 0:10:43 | 0:11:22 |
| Median | 0:10:06 | 0:10:58 |

Occurrences During Fieldwork and Interviewer/Supervisor Feedback

Interviewers reported the following occasional challenges during fieldwork:

- Some rural residents in the sample live in a remote mountain area with very limited transportation (bus only once a day) and no lodgings available.
- Long distances between rural residents' homes.
- It is very difficult for some respondents to calculate the number of drinks they consumed per day.

RESPONSE RATES

The face-to-face response rate for this study is based on American Association of Public Opinion Research guidelines (AAPOR, 2000. Standard Definitions: Final Dispositions of Case Codes and Outcome Rates for Surveys. Lenexa, Kansas: AAPOR). This represents the number of completed interviews divided by the total number of eligible households. Ineligible households are removed from the calculation. Ineligible households include the following categories:

- No eligible respondent lives there.
- The house/dwelling is not occupied.

Response Rate: RR =

Where:

I = Complete Interviews
P = Partial Interviews
R = Refusals
NC = Non-Contact
O = Other
UH = Unknown if household/occupied housing unit UO
= Unknown other

Table 5: Final response rates per city

| | Total Eligible Households Visited | Completed Interviews | Response Rate % |
|-----------|--------------------------------------|-------------------------|--------------------|
| Jiangshan | 1,019 | 650 | 64 |
| Lanxi | 1,084 | 650 | 60 |

WEIGHTING

To ensure that the two samples were representative of the adult (aged 18 and older) population of Jiangshan and Lanxi, Gallup staff prepared weights separately for each city based on available population demographics. The weighting process of the two city samples was:

- Gallup staff first reviewed household size. They capped household size at four residents aged 18 and older in Jiangshan and five residents aged 18 and older in Lanxi. They used this step to adjust for unequal probability of selection as residents of larger households have a lower probability of selection for the survey.
- Gallup staff then constructed post-stratification weights to correct for age and gender of each city due to non-response. Gallup used the Statistics Bureau of Zhejiang as the population source for constructing weights. Population targets from the Bureau were last updated in 2019.

The unweighted sample proportions, population targets and weighted proportions of each of the demographic variables appear below.

| AGE | SAMPLE % | POPULATION % | WEIGHTED % |
|----------|----------|---------------------|------------|
| 18 to 35 | 19 | 24 | 24 |
| 36 to 60 | 62 | 50 | 50 |
| 61+ | 19 | 26 | 26 |
| GENDER | SAMPLE % | POPULATION % | WEIGHTED % |
| Male | 57 | 51 | 52 |
| Female | 43 | 49 | 48 |

Table 6: Jiangshan sample

Table 7: Lanxi sample

| AGE | SAMPLE % | POPULATION % | WEIGHTED % |
|----------|----------|---------------------|------------|
| 18 to 35 | 20 | 24 | 24 |
| 36 to 60 | 69 | 48 | 49 |
| 61+ | 10 | 28 | 28 |
| GENDER | | | |
| Male | 58 | 52 | 52 |
| Female | 42 | 48 | 48 |

S6. [WP19903]

(Programmer: Auto Record total number of adults age 18 or older from S2/Name of Household <u>Members</u>)

(程序员:按照 S2 的姓名清单回答自动记录 18 岁或以上的家庭成员数量)

| Write in: | |
|-------------|--|
| 记录 : | |
| | |

(If respondent was not present for original introduction, repeat Introduction:) (如果最初介绍时,被选中的家庭成员不在现场,重新做一次介绍:)

(INTRODUCTION:) (Interviewer may adapt text as appropriate) Good [morning/afternoon/evening]. I am _____ with _____. Your household has been selected to participate in a special poll about adults' knowledge, attitudes, and behaviors regarding alcohol use. The answers will be used in a study to see how well efforts to reduce the harms caused by alcohol are working. (介绍:)访问员可以根据具体情况调整文字)

【上午/中午/晚上]好! 这是______。你的家被选中参加一个主题为成人对使用酒精饮料的了解、态度和行为的调查。答案将用于了解为减少酒精造成的危害所做努力/工作的效果如何。

INTERVIEWER, Read: It is entirely your choice whether you take part in the poll and which questions you answer. Some of the questions ask about personal and sensitive issues, such as negative drinking experiences, so it is best if this survey is conducted in a private area which allows you to express your opinions, without anyone hearing or interfering. Is there some place where we can talk without anyone else hearing the questions and answers?

INTERVIEWER, DO NOT READ: Move to a private location before continuing the interview. If respondent prefers not to go to a private location, continue with the interview.

访问员(读出): 是否参加这个调查或回答其中的任何问题,都完全取决于您本人的决定。因为其中一些问题涉及到个人的敏感信息,如不良的饮酒经历,所以这个调查最好在一个私密的空间进行,以便您能在不被任何其他人听到或打扰的情况下表达您的意见。请问有没有我们可以交谈,但不会被其他人听到我们的问题和答案的地方?

访问员(不要读出)更换到一个私密的空间后继续访问,如果受访者更愿意不更换到私密的地点,则继续访问。

Q7_1. [WP21006]

During the PAST 12 MONTHS, did you have a whole drink - more than a sip or a taste - of any kind of alcoholic beverage such as beer, wine, liquor or spirits, either commercially produced or homemade? 请问您在**过去 12 个月内, 有没有喝**过任何种类的整份酒精饮料, 如啤酒、葡萄酒、烈性酒, 不管是厂商生产的还 是自己家中酿制的(不仅仅是撮一口或尝一下)?

ENTER ONE RESPONSE: **ROUTE:** 单诜 1 Yes 有 (Continue) (继续) No 没有 2 (Skip to Q15) (DK) (不知道) 8 (跳问 Q15) (Refused) (拒答) 9

(Q7A DELETED)

Q8_1. [WP21007]

Considering just the past 30 days, have you had a whole drink - more than a sip or a taste - of any kind of alcoholic beverage such as beer, wine, liquor or spirits, either commercially produced or homemade? 请问您在过去 30 天内,有没有喝过任何种类的整份酒精饮料,如啤酒、葡萄酒、烈性酒,不管是厂商生产的还是

自己家中酿制的(不仅仅是撮一口或尝一下)?

| | | ENTER ONE RESPONSE: 单选 | ROUTE: |
|-----------|-------|---------------------------|---------------------------|
| Yes | 有 | 1 | (CONTINUE) (继续) |
| No | 没有 | 2 | |
| (DK) | (不知道) | 8 | (SKIP TO Q15) (跳问 Q15) |
| (Refused) | (拒答) | 9 | |

(INTERVIEWER: READ AND SHOW CARD:)

(访问员:出示并读出卡片:)

For the rest of the survey when we talk about a whole **alcoholic drink**, please think of a "whole alcoholic drink" as a **150 ml** glass of wine, a regular **330 ml** can of beer, or a 50 ml liang of liquor, or homemade alcohol. 在接下来的访问中,当提到"一份酒精饮料"时,请将它等同于 **150ml** 一杯的葡萄酒,或者 1 罐 常规 **330ml** 的啤酒,或者 1 两 50ml 烈性酒或自己酿制的酒

For example, a six pack of beer consists of 6 drinks, and a bottle of wine contains about 4 drinks. If you had a larger drink, such as a large bottle of beer or an oversized glass of wine, please consider that as more than one drink. A tall can of beer is 1.5 drinks.

如 1 箱 6 罐的啤酒相当于 6 份酒精饮料, 1 瓶葡萄酒相当于 4 份酒精饮料。如果你喝过更大包装的酒精饮料, 如 大瓶的啤酒或者超大杯的葡萄酒, 请将它们看做大于 1 份酒精饮料, 如一个高罐的啤酒相当于 1.5 份酒精饮料。

(PROGRAMMER NOTE: START IN "CIRCLE START" ROW. ASK Q9A-Q9E (DOWN THE COLUMN) FIRST. THEN ASK Q10 AND Q11 (IF Q9 =YES) FOR EACH ALCOHOL TYPE.)

(程序员注意:从"循环开始"行开始,向下,首先询问 Q9A-Q9E,然后针对(Q9 回答"是")的每种酒类询问 Q10 和 Q11。

Q9. In the PAST 30 DAYS, did you drink (*Programmer: Randomly rotate Q9A-E*)? (*Interviewer: If necessary show pictures of each type of alcohol*)

在**过去 30 天内**,您喝过(<u>程序员:随机循环出示 Q9A-E</u>)吗?(**访问员:如有需要,出示每种酒精饮料的图** 片)

Q10. (For each code 1 in Q9 A-E, ask Q10 and Q11, if appropriate, before going to the next item A-E:) In the PAST 30 DAYS, on how many days did you drink (Programmer: Randomly rotate A-E, as appropriate, in same order as shown in Q9)? (Interviewer: If necessary show pictures of each type of alcohol) (Q9A-E 中每个回答 1 的产品,先提问 Q10-Q11,然后再询问下一个合适的 A-E。)在过去 30 天内,您有____天喝过(程序员:按照 Q9 中的顺序随机出示 A-E)?(访问员:如有需要,出示每种酒精饮料的图片)

Q11. (For each code 1 in Q9 A-E, ask:) Please think about a typical day when you drank [(Programmer: Rotate <u>A-E, as appropriate, in same order as shown in Q9</u>)] in the PAST 30 days. How <u>many drinks</u> of [(Programmer: Rotate A-E, as appropriate, in same order as shown in Q9)] did you <u>usually</u> have on a day when you drank it? If you are unsure, or the number varied, please tell me the most common number you drank.
Please think of a "whole alcoholic drink" as a 150 ml glass of wine, a regular 330 ml can of beer, or a liang of liquor, or homemade alcohol.
(针对在 Q9A-E 中回答 1 的选项,提问:) 请回想您在过去 30 天内喝(程序员:按照在 Q9 中的顺序出示 A-E) 最有代表性的一天中,您通常一天喝相当于多少份酒精饮料的(程序员:按照在 Q9 中的顺序出示 A-E)? 如果

您不确定,或者喝的数量有变化,请填写您最通常喝的数量

"一份酒精饮料"时,等同于 150ml 一杯的葡萄酒,或者 1 罐常规 330ml 的啤酒,或者 1 两烈性酒或自己酿制的酒。

Q12. [WP20165]

What was the greatest number of whole drinks of an alcoholic beverage you had on any ONE day in the past 30 days? A whole alcoholic drink is a 330 ml bottle or can of beer, malt liquor, or flavored malt beverage, a 150 ml glass of wine or champagne, a 50 ml liang or shot of liquor, or a whole mixed drink. (*Open ended and code actual number*) (*Programmer: Display two single-digit boxes to enter numbers 1-97, plus check boxes for don't know and refused*)

在过去的 30 天里你喝得最多的一天中,喝了多少份酒精饮料? 一份酒精饮料相当于1瓶/罐啤酒、麦芽酒、风味麦芽啤酒、一杯葡萄酒或香槟、一小杯烈酒,或者一份混合酒。(*开放答案和实际数字编码*)

(程序员:出示两个单个数字的格子填写1-97的数字,另外增加不知道和拒答的复选框)

(Interviewer: SHOW whole drink show card detail)

(程序员:出示整份酒精饮料的详细卡片)

(Programmer: If the number in Q12 is 1-97, it should not be less than any of the number of drinks in Q11A-E; If it is, prompt interviewer to repeat the question to double check the response was coded correctly)

<u>如果 Q12 的答案是 1-97,那么这个数值不能小于 Q11A-E 中的任何一个种类的数量。否则,访问员请重复该问题,以</u> 再次确认受访者的回答是否正确)
